

training  
professionals

This is to certify that

*Adam Barrett*

of ResQsupport  
has successfully completed the following  
course of instruction

Water Rescue One Technician  
27-31 July 2020

Issued under current conditions specified in Outreach Rescue Training Provision General Information

Lead Instructor:

Miles Hill

Dated: 11 August 2020

\*Re-certification date 27/07/2023 (3 Years)

Outreach Rescue  
Tan-Y-Bwlch Centre, Llanllechid, Bangor, Gwynedd, Wales LL57 3HY

[www.outreachrescue.com](http://www.outreachrescue.com)

The candidate has satisfied the assessment criteria in accordance with their record of performance in the following topics:

1. Hydrology – physical features in the water environment
2. In-water Skills – including wading
3. Reach & Throw Rescues and Cinches
4. Health & Safety requirements including PPE
5. Anchors, belays, pulleys
6. Running Rescues and R.A. and Team Maintenance
7. Boats and Pathways
8. Lowers and Vectors
9. Tethered Rescues and Casualty Contact
10. Inflated Hoses, Cableways and Downstream Safety

**\*Industry Standards generally recommend re-certification every three years. However, we recommend re-certification every two years, to minimise skill decay, while operation or training exposure is limited.**

## Outreach Rescue Training - Record of Performance

Name of Delegate: **Adam Barrett**

Outreach Course: **Water Rescue One Technician**

Date of Course: **27-31 July 2020**

The delegate achieved the following marks for their **core skills** during the course:

1. Hydrology – physical features in the water environments	<b>8</b>
2. In-Water Skills – inc. Wading	<b>7</b>
3. Reach + Throw Rescues + Cinches	<b>7</b>
4. H & S requirements inc PPE	<b>8</b>
5. Anchors, belays, pulleys	<b>8</b>
6. Running Rescues + R.A. + Team Maintenance	<b>9</b>
7. Boats and Pathways	<b>7</b>
8. Lowers and Vectors	<b>7</b>
9. Tethered Rescues + Casualty Contact	<b>7</b>
10. Inflated Hoses, Tensioned Diagonal + Downstream Safety	<b>8</b>

**FINAL OVERALL GRADE**  
(Pass / **Not yet competent**)

**PASS**

### Core Skill Indicator Key

**Below 5:** Requires further development before safe and acceptable performance is established.

**5-6:** Has demonstrated the skill and /or indicated knowledge and understanding with safe application.

**7-8:** Has demonstrated clarity and confidence in applying and/or indicating an appropriate response.

**9-10:** Has demonstrated certainty, immediacy, control and clarity of skill and/or understanding even in complex situations.

**Outreach Rescue Training is carried out within the framework detailed below: -**

*Knowledge, Skills and Ability Assessment*

The knowledge, skills and ability assessment that provides the candidate's individual performance indicators against each defined core syllabus area, are arrived at through the application of a number of the following:

- Continuous assessment
- Set piece skills applications
- Scenario based practical assignments
- Contribution to a team exercise
- Scenario based table top exercise
- Verbal Q&A to demonstrate understanding
- Written multi choice exam
- Scenario based written exam
- Development of lesson plans, risk assessments, etc
- Others as appropriate

It is not possible in short course programmes to provide multiple assessments of all areas but the primary methods of assessment are as shown on the course data sheet.

Instructors will select complementary approaches before arriving at individual indicators. The outcomes of any such assessment will provide a reflection of combinations of knowledge, skill and ability as demonstrated at that time. In using differing types of assessment methodology we aim to provide a range that will maximise the opportunity to indicate learning acquisition, but in a short course programme this cannot be an exhaustive process.

Where course pre-requisites require skill maintenance, experience or development, no judgements are made or implied in these assessments regarding the quality or appropriateness of the pre-requisites unless specifically noted. It is the responsibility of the candidate and their sponsoring organisation to ensure integration of this programme within a thorough ongoing skills maintenance process appropriate to the requisite role requirements.

The indicator system is aimed at providing markers to inform the ongoing work-based training and development processes and assessment. They are not a substitute for work based competency assessment.

The skill level indicator system we apply equates to the following:-

Below 5	Requires further development before safe and acceptable performance is established.
5-6	Has demonstrated the skill and/or indicated knowledge and understanding with safe application.
7-8	Has demonstrated clarity and confidence in applying and/or indicating an appropriate response.
9-10	Has demonstrated certainty, immediacy, control and clarity of skill and/or understanding even in complex situations.
